

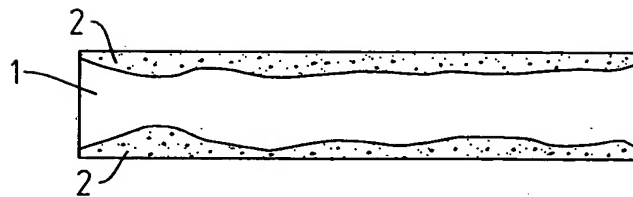

**Fig. 1**

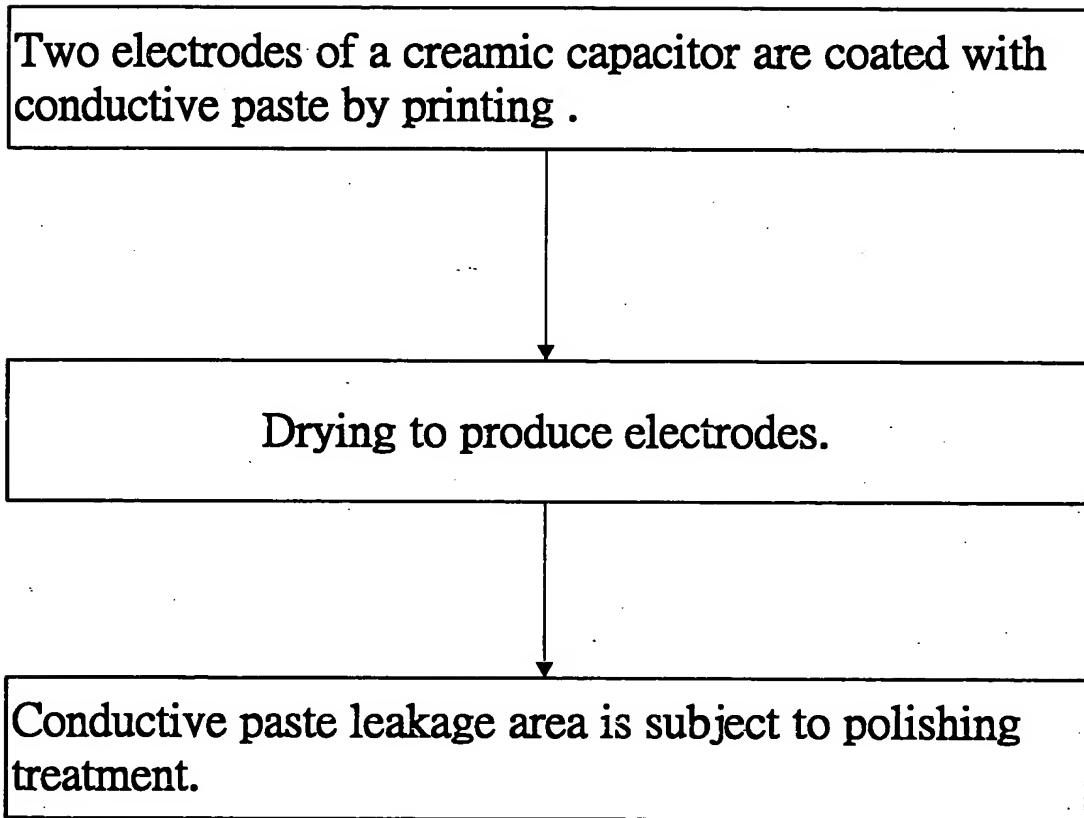

**Fig. 4**

Two electrodes of a ceramic capacitor are coated with  
conductive paste by printing under viscosity control.

Drying to produce electrodes.

**Fig. 2**

**Fig. 3**

Two electrodes of a ceramic capacitor are coated with conductive paste by chemical electroless electroplating or vacuum deposition .

Drying to produce electrodes.

Conductive paste leakage area is subject to polishing treatment.

**Fig. 5**
